**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-28, drawn to a foam dispenser, classified in class 222, subclass 145.5.
  - II. Claims 29-41, drawn to an apparatus for driving a reciprocating rod, classified in class 74, subclass 25.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention (I), the foam dispenser can be used to mix two different products to produce foam, and invention (II) discloses an apparatus having a drive shaft, a crank a slider that can be used to drive other movable devices. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. A telephone call was made to the applicant's attorney Mr. Dennis Rodgers on 7/30/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
